

Datasheet: Hoboken

Hoboken Oak is a vintage Reclaimed Wood with rugged authenticity. Originating from the Balkan region of Europe, the wood comes from buildings that were constructed over 150 years ago. Sourced from old mills, homes and churches, our Hoboken Oak was once structural beams that were integral to these longstanding buildings.

The materials distinct brown coloring comes from natural aging processes, which takes a very long time for Oak. Our Hoboken Oak is sliced thin and applied to an MDF board, opening up new possibilities for designing with Reclaimed Wood.

Our Reclaimed Wood is **heat treated** and **metal free!**

Source: Romania & Croatia

Prior Use: Churches, mills, residences

Species: European White Oak (*Quercus*)

Size: 3/4" x 4' x 8' & 10' panels

Character: Wire brushing and patented "saw effects" scratching options impart character, texture, and authenticity to the meticulously assembled panel.

Material #: HB-O
