

Datasheet:

Palomino Barn Wood

Mission Bell's Palomino Barn Wood is reclaimed from barns in the South built from the 1800s up until the 1940s. Our Palomino Barn Wood includes the warm tones and natural texture of three species: Tulip Poplar, Beech and Pine. Exposed to the elements for decades, all species have a beautifully harmonized rustic and timeless character. The color and patina is achieved naturally, so no finishing is necessary. Our Palomino Barn Wood is ready to go when you are. Like your favorite pair of jeans, this set of barn wood is well-worn and comfortable. Build the next chapter of American history with the Palomino Barn Wood in your project.

Our Reclaimed Wood is **heat treated** and **metal free!**

Source: Kentucky, Tennessee, Virginia, Ohio and Illinois

Prior Use: Barn siding

Species: Tulip Poplar (*liriodendron tulipifera*), Beech (*fagus*) and Pine (*pinus*)

Size: 3/4" x 3", 3/4" x 4", 3/4" x 5"
